# Ubuntu8.04 安装 TFTP 服务器

### 一、配置 TFTP Server

#### 安装:

# sudo apt-get install tftp-hpa tftpd-hpa xinetd

#### 配置:

```
# sudo mkdir -p /tftpboot
# sudo chmod 777 /tftpboot
# sudo vi /etc/xinetd.d/tftp
```

```
service tftp
{
    disable = no
    socket_type = dgram
    protocol = udp
    wait = yes
    user = root
    server = /usr/sbin/in.tftpd
    server_args = -s /tftpboot -c (或 server_args = -sc /tftpboot)
}
```

# sudo /etc/init.d/xinetd restart

## 二、TFTP Client 使用

```
p file (上传)
g file (下载)
q (退出)
connect IP (连接远程 TFTP 服务器)上传下载
?(帮助)
```
